CESAB R200 1.4 - 1.6 tonne

## The CESAB R200 does it better

### The reach truck that fits all your needs

- Load capacities 1.4 and 1.6 tonnes
- Superior all-round visibility for the driver
- Fully adjustable workspace, adaptable to any morphology
- 360° steering for smooth, fast and save material handling
- Optimal Truck Performance: safe use of the full truck potential
- Transitional Lift Control for shockless and fastest lifting and lowering
- Intelligent Mast Design for best visibility and safety
- Digital colour display, an innovative new man-machine interface

### Unique, 900 mm between support arms

The CESAB R200 reach truck offers a unique feature that assures cost savings and capacity increase in your warehouse.

Slim-fit on the outside, only 1120 mm wide, but 900 mm width between the support arm so you can pull an 800 mm Euro-pallet between the support arms without lifting!

The advantages are obvious:

- Less expensive racking as you don't need the lower layer anymore that compensates for the support arm height
- You gain in stocking capacity and win 40 to 50 cm in height
- The driver gains in performance as he has less handling to do to place a pallet

### More comfort for 100% productivity

The driver compartment of the CESAB R200 is fully adjustable and any driver will find a comfortable, optimal drive position.

#### Seat adjustments:

- Forward/backward
- Suspension (weight)
- Backrest angle
- Lumbar support
- Seat cushion length

#### Available seat options:

- Air-suspended version
- Heated version
- Orange seatbelt

#### Steering column adjustments:

- Up and down
- Column angle
- Column length

#### Command console:

- Horizontally
- Vertically

#### Floor board:

- Up and down

## More precision for 100% security

The new steering column has a lower profile to create more space for the driver's knees. The palm support size was increased to avoid fatigue.

Software wise, the system has a higher resolution for more precise manoeuvring and faster response while turning the wheel. Overall, the driver will experience a more responsive and agile CESAB R200

### Optimised Truck Performance

The CESAB R200 features Optimised Truck Performance that regroups three features:

- Optimised corner control that automatically adjusts the drive speed in a curb
- Optimised reach control to avoid mast sway especially at high lift heights
- Optimised speed control with the mast reached out again to avoid mast sway

## The complete package

CESAB'S commitment to creating superior products is matched by its drive to deliver unrivalled service and support. Every CESAB customer benefits from a nationwide network of local dealerships.

Buying a CESAB reach truck is only the beginning of the support from your nearest dealer, with the experienced and fully qualified service engineers only a local call away.
